

When it comes to *B. cereus*, you want to be sure.

Neogen® Petrifilm® *Bacillus cereus* Count Plate

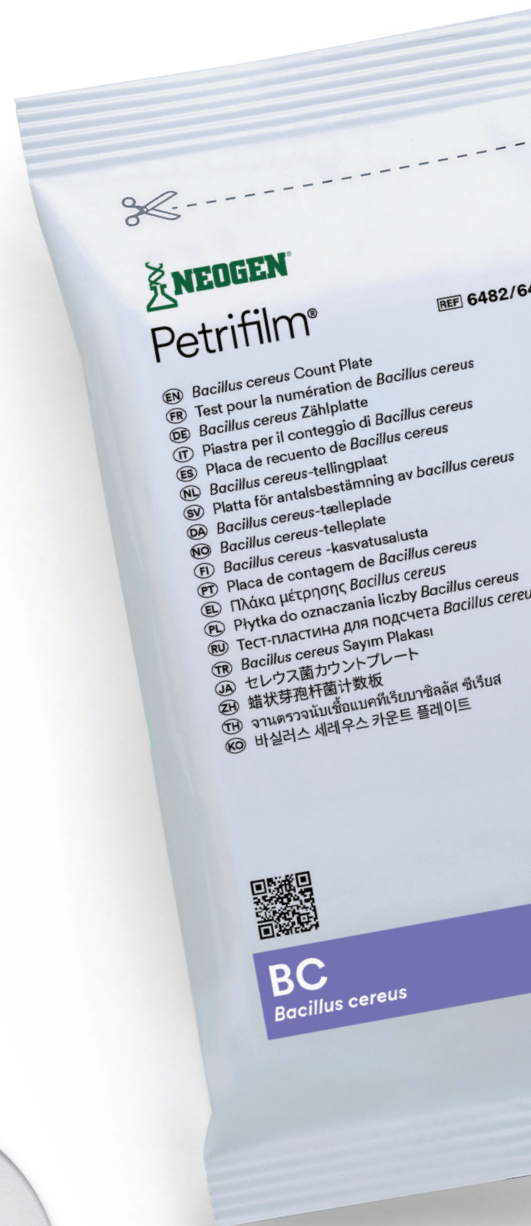

Say goodbye to the hassle of the MYP reference method with Petrifilm plates. Ready to use straight from the package, Petrifilm plates require no preparation, saving your team from exposure to antibiotic supplements. Plus, the space-saving size combined with fewer dilutions and drying time, frees up valuable lab and incubator space.

Petrifilm plates efficiently provide clear, reliable results to help you combat the persistent threat of *B. cereus*.

It's easy to use. Easy to read.* Easy to interpret.*

*Compared to reference method agar.

BC

Bacillus cereus Count Plate

Petrifilm *Bacillus cereus* Count Plate

Benefits for you

Simple

Ready-to-use plates
No handling of antibiotic supplements

Comprehensive

Tests for the entire *Bacillus cereus sensu lato* group, including *B. cytotoxicus*.

Complete

A selective and differential medium that allows the enumeration of *Bacillus cereus* without confirmation.

Clearly the better choice.

The Petrifilm BC Count Plate is easy to interpret, featuring clear colonies instead of the swarming morphologies you get with the traditional reference method.

Typical *Bacillus cereus* colonies are red-violet with the presence of a white zone.

Product Information

Stack height	10 plates or less
Optimum pH range	>5
Recommended counting range	≤100 CFU
Counting area	30cm ²
Incubation Temperature	30°C ± 1°C or 35°C ± 1°C
Time to Result	20–24 hr

Description	SKU	Contents
Petrifilm <i>Bacillus cereus</i> Count Plates	700006920 6482	50 plates/box
